  ∨ Global Object   ●
    JS app.js   U

```javascript
 1    // console.log();//global
 2    // setTimeout();
 3    // clearTimeout();
 4    // setInterval();
 5    // clearInterval();
 6
 7    // window.console.log();// You can write with or without the global keyword 'window' in js
 8    // global.console.log();// Similarly for Node.js we have the keyword 'global'
 9
10    var message = 'Msg';// variable declared here are added to the global object hence the output is 'undefined'.
11    console.log(global.message);
12
```
